

1. Use the netstat command on your Windows or Linux system to list all currently open ports and their associated services, then take a screenshot of the output.

```
(kali@kali)-[~]
└─$ sudo netstat -tulnp
Active Internet connections (only servers)
Proto Recv-Q Send-Q Local Address           Foreign Address         State       PID/Program name
udp6      0      0 0 fe80::da14:9b0e:74e:546 :::*                    468/NetworkManager
```

2. Check which applications are using ports 80 and 443 on your system by using the command line tool (netstat, lsof, or Resource Monitor), and write down the process names you find.

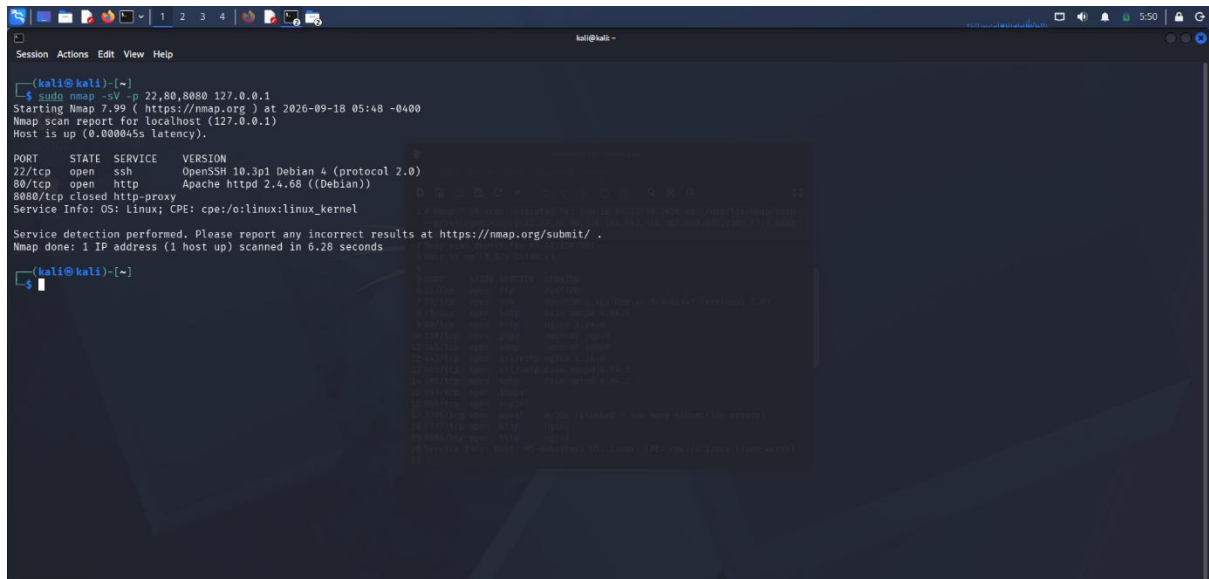

```
(kali@kali)-[~]
└─$ sudo netstat -tulnp | grep -E ':80|:443'

(kali@kali)-[~]
└─$ sudo ss -tulnp | grep -E ':80|:443'

(kali@kali)-[~]
└─$
```

Ports 80 and 443 were checked using the netstat and ss commands. No applications were found listening on either port on the kali Linux system.

3. Scan your own system for open ports using Nmap or Zenmap and identify at least three services running on those ports.

```
(kali@kali)~$ sudo nmap -sV -p 22,80,8080 127.0.0.1
Starting Nmap 7.99 ( https://nmap.org ) at 2026-09-18 05:48 -0400
Nmap scan report for localhost (127.0.0.1)
Host is up (0.000045s latency).

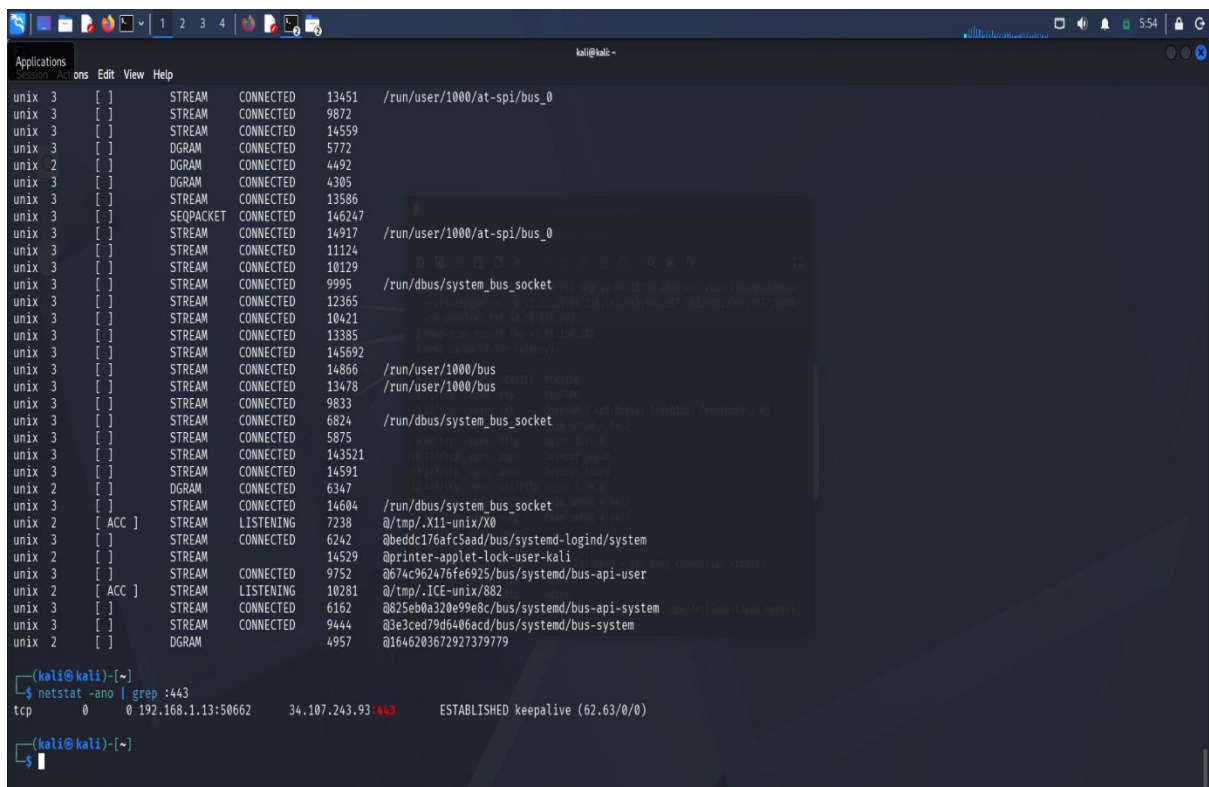

PORT      STATE SERVICE VERSION
22/tcp    open  ssh      OpenSSH 10.3p1 Debian 4 (protocol 2.0)
80/tcp    open  http     Apache httpd 2.4.68 ((Debian))
8080/tcp  closed http-proxy

Service Info: OS: Linux; CPE: cpe:/o:linux:linux_kernel

Service detection performed. Please report any incorrect results at https://nmap.org/submit/ .
Nmap done: 1 IP address (1 host up) scanned in 6.28 seconds

(kali@kali)~$
```

4. Pick any app you use daily (like Spotify, WhatsApp Desktop, or a local web server) and check which ports it opens on your system while running. List the port numbers and explain in one line what each port is typically used for.

```
(kali@kali)~$ netstat -ano | grep :443
tcp        0      0 192.168.1.13:50662 34.107.243.93:443  ESTABLISHED  keepalive (62.63/0/0)

(kali@kali)~$
```

| Port Number | Protocol | Typical Use                                                            |
|-------------|----------|------------------------------------------------------------------------|
| 80          | TCP      | HTTP web traffic.                                                      |
| 443         | TCP      | HTTPS secure web traffic commonly used for encrypted communication.    |
| 5222        | TCP      | XMPP messaging communication commonly used for messaging applications. |
| 3478        | UDP/TCP  | STUN/TURN services used for establishing voice and video connections.  |
